PROFILE

A Data Scientist with a strong analytical background and hands-on experience in data preprocessing, exploratory data analysis, and predictive modeling. Skilled in Python, SQL, and data visualization, with a research-driven mindset and the ability to communicate insights clearly to all audiences.

EMPLOYMENT HISTORY

Research Student , Technical University Dortmund

Sept 2024 — Present, Dortmund

- Theoretical and Robotics focuses on designing intelligent systems that can sense, decide, and act autonomously. It combines control engineering, computer science, and mechanical systems to build robots and automated
- Simulation-driven development using tools MATLAB/Simulink, ROS and Python-based robotics frameworks
- Data-driven robotics and automation: data preprocessing, analysis, system optimization, and application of machine learning for performance improvement. Tech stack: Python (NumPy, Pandas, Matplotlib, scikit-learn), MATLAB, ROS/ROS2.

Research student , Yandex

2022 — Feb 2023, Moscow

- Performed large-scale data extraction, cleaning, and transformation using SQL queries, spreadsheets, and scripting tool
- Conducted exploratory data analysis (EDA) to identify patterns, trends, and actionable insights from structured datasets.
- Worked on price estimation regression model for of taxi prices on yandex Go

EDUCATION

Technical university Dortmund, Master of Science

Oct 2024 — Present, Dortmund

Automation and Robotics

Voronezh state university of engineering technology, Bachelor of engineering

Sept 2018 — Jul 2022, Voronezh

Automation of technological processes and production GPA:4.85/5

SKILLS

Python

sql

Amazon web services

pandas

excel

matplotlib

cli

git and git control

seaborn

sci-kit learn

LANGUAGES

English

German

Russian
